

Technical Data Sheet

Fluorosilicone(WCMFVMQ)

CHEMICAL DESCRIPTION: Copolymer of fluorovinyl and methyl siloxane

PROPERTIES

ASTM classification: FVMQ

Typical applications: Food and medical applications, aircraft fuel systems

Advantages: Excellent resistance to high and low temperatures

Excellent ozone resistance

Excellent compression set resistance

Good resistance to oils and most non-polar solvents

Disadvantages: Poor tensile strength and abrasion resistance

Available hardness range (Sh. A): 25 - 90

Upper continuous service temp. (℃): 225

Min. temp. for sealing applications. (\mathfrak{C}): -60

Minimum non-brittle temp. (\mathfrak{C}): -80

Tensile strength (up to): 9 MPa

Elongation at break (up to): 400%

N.B. With all compounds, differing hardness's can affect final properties of the mix.

OMPOUNI

Care should be taken in selecting the most suitable quality for each application. Advice is available, but final responsibility remains with the customer.
