

Technical Data Sheet

<u>Tetrafluoroethylene-perfluorovinylether-ethylene</u> <u>terpolymer (WCMFEPM T)</u>

CHEMICAL DESCRIPTION: Fluorocarbon terpolymer of tetrafluoroethylene,

perfluorovinylether and ethylene, which has been designed for use in extreme environments.

PROPERTIES

ASTM classification: FEPM

Typical applications: Seals, O-rings, gaskets and packers for oil

exploration and production

Advantages: Excellent high temperature resistance

Outstanding chemical resistance (including acids &

bases)

Excellent resistance to oils and non-polar solvents

Excellent ozone and weathering resistance

Excellent steam resistance

Disadvantages: Poor low temperature performance

Available hardness range (Sh. A): 70 - 95

Upper continuous service temp. (℃): 250

Min. temp. for sealing applications. ($^{\circ}$): -9

Minimum non-brittle temp. (℃) -10

Tensile strength (up to): 23 MPa

Elongation at break (up to): 300%

N.B. With all compounds, differing hardness's can affect final properties of the mix.

OMPOUN

Care should be taken in selecting the most suitable quality for each application. Advice is available, but final responsibility remains with the customer.
